

## **LIFT AND TRAILER FOR WATERCRAFT**

### **ABSTRACT OF THE DISCLOSURE**

A dolly and trailer provide for transport and/or storage of watercraft. The dolly includes a lift and a winch that can be utilized to shift a watercraft from the trailer to the dolly. The trailer includes watercraft supports that are retractable to permit the trailer to be used as a utility trailer. Alternately, the supports can be positioned upwardly to support a watercraft on the trailer. A watercraft on the dolly can be positioned at an upper position for transport to the trailer or vice versa, and the dolly and the trailer each include winches to permit a single person to readily transfer the watercraft from the dolly to the trailer or vice versa.
